3. J3 : ATX POWER SWITCH

The system power is controlled by a momentary switch (when "power switch type" is set to momentary) connected to this lead. Pushing the button once will turn on the system and pushing another time will turn off the system. Selecting toggle by the "power switch type" will allow this lead to be controlled by a toggle-or rocker-type switch, where one side is "OFF" and the other side is "ON". The system power LED shows the status of the system's power. This connection does not have a function when a standard power supply is used.
